

BRIANNA PEDIGREE DIAGRAM

The complex pedigree of BRIANNA, a hybrid created in Wisconsin (US), involves deliberate and natural crosses between 93 distinct parents encompassing the species *Vitis aestivalis*, *Vitis berlandieri*, *Vitis cinerea*, *Vitis labrusca*, *Vitis lincecumii*, *Vitis riparia*, *Vitis rupestris* and *Vitis vinifera*. In this pedigree, some varieties appear more than once simply to make the illustration easier to read, and *Vitis* is abbreviated to *V.* in some instances to save space.
